Book one way outstation cab and display the lowest charges

Steps followed to integrate Jenkins with our project

Step1:

Open https://jenkins.io/download/ and download the '.war' file of Jenkins . We have downloaded

the 2.277.4 LTS Version.

⬇ Download Jenkins 2.277.4 LTS for:	⬇ Download Jenkins 2.293 for:
Generic Java package (.war) SHA-256: 26b278064393befa74f543d23050ca08589a6c14207cac06a0fbf6994113e7a7	Generic Java package (.war) SHA-256: bd2e70b6dbec1f5c8b5ed75b9b4e0af10bf9e716e24bd54a05ef436cc857139c

Step2:

Now open command prompt and run Jenkins file "jenkins.war" using command:

```
java -jar jenkins.war --enable-future-java  --httpPort=8082
```

Used the enable future flag because we had the java 15.0.2 version

Step3:

On running above command Jenkins would be setup on the localhost:<port number in command>.

This can be accessed by any browser, you would be redirected to a page asking for initial admin

password which would be available at the bottom of command prompt, where the jenkins.war is

run as shown in step 1, enter that password in the textbox , and setup Jenkins plugins and user

account

Step4:

Now click on new item and enter a name for your project and click on freestyle project and click

on OK

Now go to configure and under Build, you can enter the project location and maven command to

run project

Now go back to project and Click on "Build Now", the test cases will run:

Jenkins

Dashboard › GRP2Hacakathon ›

- Back to Dashboard
- Status
- Changes
- Workspace
- Build Now
- Configure
- Delete Project
- Rename

Console Outputs

Dashboard › GRP2Hacakathon › #5

- Back to Project
- Status
- Changes
- Console Output
  - View as plain text
- Edit Build Information
- Delete build '#5'
- Previous Build

✅ Console Output

```
